## **DETAILED ACTION**

### ***Drawings***

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because figures 1A, 9A, and 9B include "44" as the exit aperture, the exit aperture should be labeled "34". Additionally the "obscuration" mention in claim 4 is not shown in the drawings. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### ***Allowable Subject Matter***

Claims 4-16 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record, taken alone or in combination, fails to disclose or render obvious a spectrum analyzer or spatial radiation modulator that includes, a plurality of radiation filters at different radii from the rotation axis for modulating intensities of components to provide and encoded beam (claims 4 and 7), a plurality of radiation filters at different radii from the rotation axis, each filter modulating the intensity of a spectral component in a dispersed image to provide two or more encoded beams (claim 13), or the modulator comprising at least one filter, the filter comprising an annular region encompassing a number of non-contiguous regions patterned within the annular regions (claim 14), in combination with the rest of the limitations of claim.

***Conclusion***

This application is in condition for allowance except for the following formal matters:

See above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

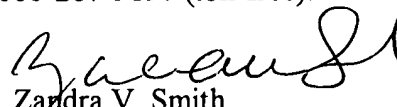

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
